DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This 2 1/2 story frame house rests on a low brick foundation, facing east. The main block is three bays wide by two bays deep and has a hipped roof with a small front gable. A full-height, gable-roofed wing, one bay wide and one bay deep, extends to the north; another two-story gabled wing, and a one-story shed addition, extend to the (west) rear. The building is sheathed in novelty siding, with standing seam metal covering the roof. The modillioned cornice returns slightly at the north gable; the peak of this gable holds a pointed 4/2 sash window which lights the attic.

On the principal (east) facade, the entrance occupies the northernmost bay of the main block. The door is surmounted by a three-pane transom and flanked by two-pane sidelights. Tall 2/2 windows occupy the remaining bays on the first floor, with slightly lower counter-parts aligned directly above them. Window and door openings throughout the building have pedimented trim.

SPECIFIC DATES

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

This building's complex form is likely the result of a series of additions which have been effectively integrated into a statement of the Colonial Revival style popular around the turn of the 20th century. Its overall design relates the house visually to its larger Colonial Revival neighbors along Washington Street.
